The Factory Floor

AP Human Geography · Unit 7 · No stimulus (like Question 1) · 7 points · Student handout · GeoArcade FRQ Tutor

Name _____ Date _____ Period _____

Directions: Answer all parts of the question. Respond in complete sentences; an outline or bulleted list is not acceptable. Label each part (A, B, C...). For Describe and Explain parts, write it out with **T1-** (your reason in general words), **E2-** (the specific proof), and **A3-** (why it matters).

No stimulus. Every factory sits where it does for a reason: close to its raw materials, its customers, or cheap workers. When those costs change, whole industries move, and the places they leave behind have to find a new way to make a living.

A. Identify ONE of the three location factors in Alfred Weber's least-cost theory of industrial location. IDENTIFY

B. Describe why a bulk-reducing (weight-losing) industry, such as copper smelting, usually locates near its source of raw materials. DESCRIBE

T1-

E2-

A3-

C. Explain ONE reason the Industrial Revolution began in Great Britain in the 1700s. EXPLAIN

T1-

E2-

A3-

D. Explain ONE cause of deindustrialization in the Rust Belt of the United States since the 1970s. EXPLAIN

T1-

E2-

A3-

E. Using ONE real Rust Belt city as an example, explain ONE economic or social effect of deindustrialization on that city. EXPLAIN

T1-

E2-

A3-

F. Explain how microloans can promote economic development, especially for women in developing countries. EXPLAIN
